

# Substance Abuse Services Available for Children and Adolescents

## Substance Abuse

Substance abuse or dependence includes a range of problems that can affect anyone. These include misuse of alcohol, illegal drugs, prescription medications, and designer drugs. Just as in other illnesses, individuals have different risk factors for substance abuse. These include their genetics, psychological traits, and environment.

## How Can I Get Services? CSB Name and Address

### How treatment works

Treatment starts with a complete assessment to determine how severe the problem is and help the professional counselor plan the best approach to treatment.

The counselor will work with the child and the family. Based on the assessment, the counselor may refer the child for follow up treatment.
