

What our mentors have to say...

“I’ve learned that there are a lot of options my mentee can explore for working & living in the community, & to feel safe & secure in his or her home.”

-Chris

“After you learn to advocate for yourself, you can advocate for others!”

-Ivy

Why Peer Mentoring?

Our peer mentors are highly enthusiastic self-advocates who are dedicated to helping others reach new levels of independence & inclusion in their communities. They are ready to partner with you to help advocate a for the future you want & deserve.

The Peer Mentor program is based on the principle that individuals will often learn best through interactions with their peers.

All peer mentors have completed training to help prepare them for their role. Training has focused on system navigation, service options and mentoring skills.

Change is exciting.

It can also be nerve-wracking.

**There are people living with disabilities who have
already been through this.**

**They would like to help you. Would you like to talk
with one of them about what's it's like & how they
can help you?**
