

# Quality Council Region 4 Urinary Tract Infection (UTI) Learning Collaborative

## Call 4: Clean Urine Catch

**June 27, 2024**

Developed and Presented by Office of Community Quality Improvement in collaboration with the Office of Integrated Health Supports Network at the Virginia Department of Behavioral Health and Developmental Services

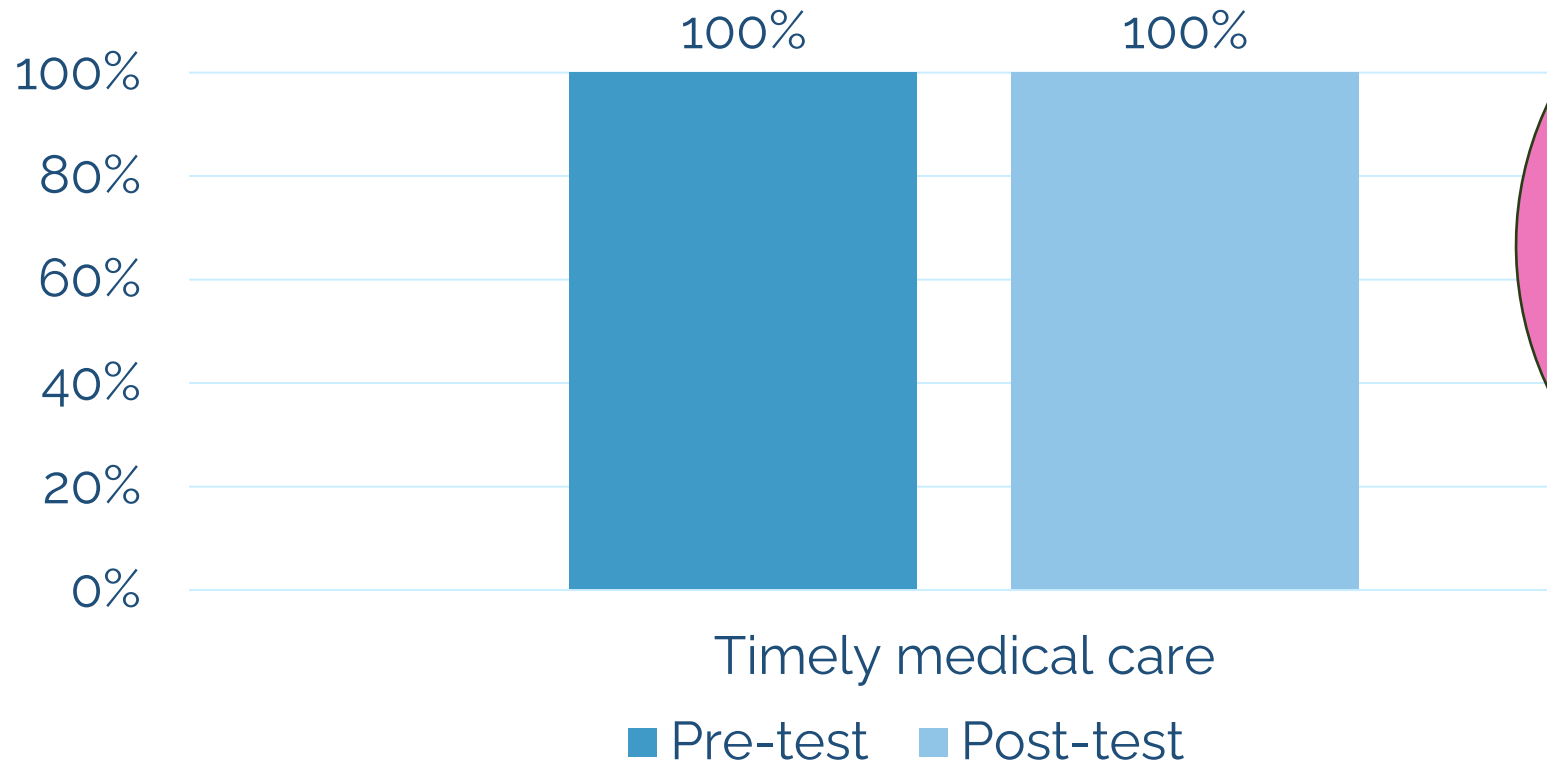

Agenda	Presenter	Time
1. Review previous changes, including most recent: <b>timely medical care</b> , and data	Mary Beth Cox, Pebbles Brown & Participants	15 minutes
2. Third Change: <b>Clean Urine Catch</b>	Marylou Bryan Brian Phelps	60 minutes
3. How to do a Plan-Do-Study-Act (PDSA) on this change.	Mary Beth Cox, Pebbles Brown	20 minutes
4. Planning and sharing time	Participants	10 minutes
5. Q&A, Adjourn	Group	5 minutes

# Let's Review →

Combined Scores, Pre vs. Post

Any reflections on what you learned about timely medical care?

## Share and Report out!

- **Timely Medical Care**
- **In June....**
- What did you do **re: My Care Passport and Medical care card?**
- Did you train staff? IF so, how many?
- Was the My Care Passport completed for individuals?
- What happened? What worked well?
- What were some barriers? If you overcame them, how so?
- What did you learn?
- Did you change anything else? *E.g., proper supplies, new P&P?*
- Did you use the plan-do-study act (PDSA) worksheet?

# Share and Report out!

## Handwashing / Hand Hygiene

- **Since April....**
- How have you promoted handwashing?  
How many staff have you trained?
- Were staff receptive to the information?
- Did staff demonstrate increased knowledge and competency?
  - Did you use the pre-test/post-test that was provided?
- Did staff apply the information to their work?
- What were the results?

## Perineal Care

- **Since May....**
- What did you do re: perineal care?
- Did you train staff in perineal care?
- What happened? What worked well?
- What were some barriers? If you overcame them, how so?
- What did you learn?
- Did you change anything else? E.g., proper supplies, new P&P?
- Did you use the plan-do-study act (PDSA) worksheet?

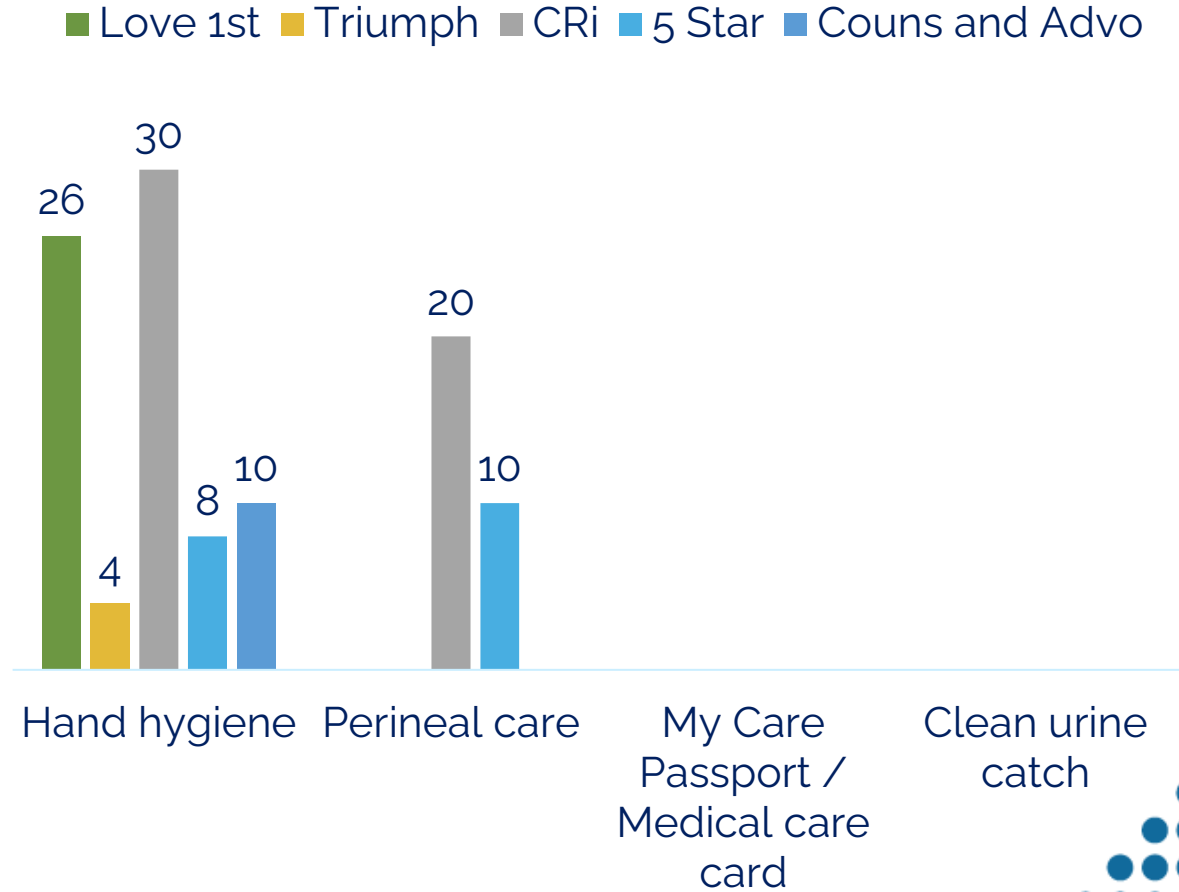

# Sharing & Good ideas

# Staff Trained on UTI Topics

Describe how you provided training.	<b>How else did you use this month's intervention?</b>	<b>What did you learn from trying this intervention?</b> What were your successes? What were the barriers?
Hands on. One to one	Taught the info to individuals and staff	That we don't know how to wash our hands. Great feedback. Getting individuals to perform it consistently
Handout	Taught to staff and individuals	<b>Additional ongoing training is necessary</b>
in person- education provided and then hand washing activity	<b>taught the information to individuals</b>	Most of our staff is efficient in handwashing. <b>Staff and the individuals were engaged and enjoyed the activity.</b>
Through verbal communication and demonstration	Taught information that <b>extended to our own households</b>	We learned the importance of hand hygiene something we have all overlooked. <b>Teaching the proper way to clean your hands and seeing it implemented on a daily basis is encouraging;</b> <u>the barrier would upholding this positive behavior across the board.</u>
A plan has been developed to add this training to DSP orientations and DSP yearly training with Black light lotion.	Hand washing Best practices reminders and <b>supplies have been added to all staff and clinic bathrooms to promote the practice.</b> Hand washing best practices <b>was offered to the entire CAA</b> staff (not just the staff that sever our Sponsor homes) at <b>Annual training on May 7.</b> Hand washing exercise with use of lotion and black light was offered to all staff if they are interested. They will meet with Maria Nojaim for training. Clients that are able to conceptualize the training will also be provided to Clients at their annual reassessments . ( 2 to date have completed the training)	We are still learning. <b>I have learned reminders of best practices are always useful .</b> We all get busy and rush and the simple act of rushing can spread infection. <b>Our clients will need frequent reminders and re training on hand washing.</b>

Describe how you provided training.	How else did you use this month's intervention?	<b>What did you learn from trying this intervention?</b> What were your successes? What were the barriers?
During each program monthly staff meeting	Staff meeting education	Staff was receptive and understood all instructions.
During our monthly staff meetings	Discussions as needed individually	<b>No UTI's for a few months!</b>
We discussed proper perineal care in home with handouts	taught the information to individuals	Staff was very open to reviewing this information and <b>we learned that some staff needed further training</b>

# SAVE: Discuss data report disconnects

- Make sure your report is on the correct month and change topic.
- A new Change Strategy is implemented each month.
- For **April, reporting in May**, the Change Strategy was Hand Hygiene/Hand washing.
- For **May, reporting in June**, the Change Strategy was Perineal Care.
- For **June, reporting in July**, the Change Strategy is a Local Medical Care Card and My Care Passport.
- For **July, reporting in August**, the Change Strategy is urine collection.
- **“Did you try this month’s intervention?” – Say ‘yes’ if you did anything to implement the change. Staff training, new supplies, new policy/procedure, etc.**
- Please try using the Plan-Do-Study-Act forms. 😊

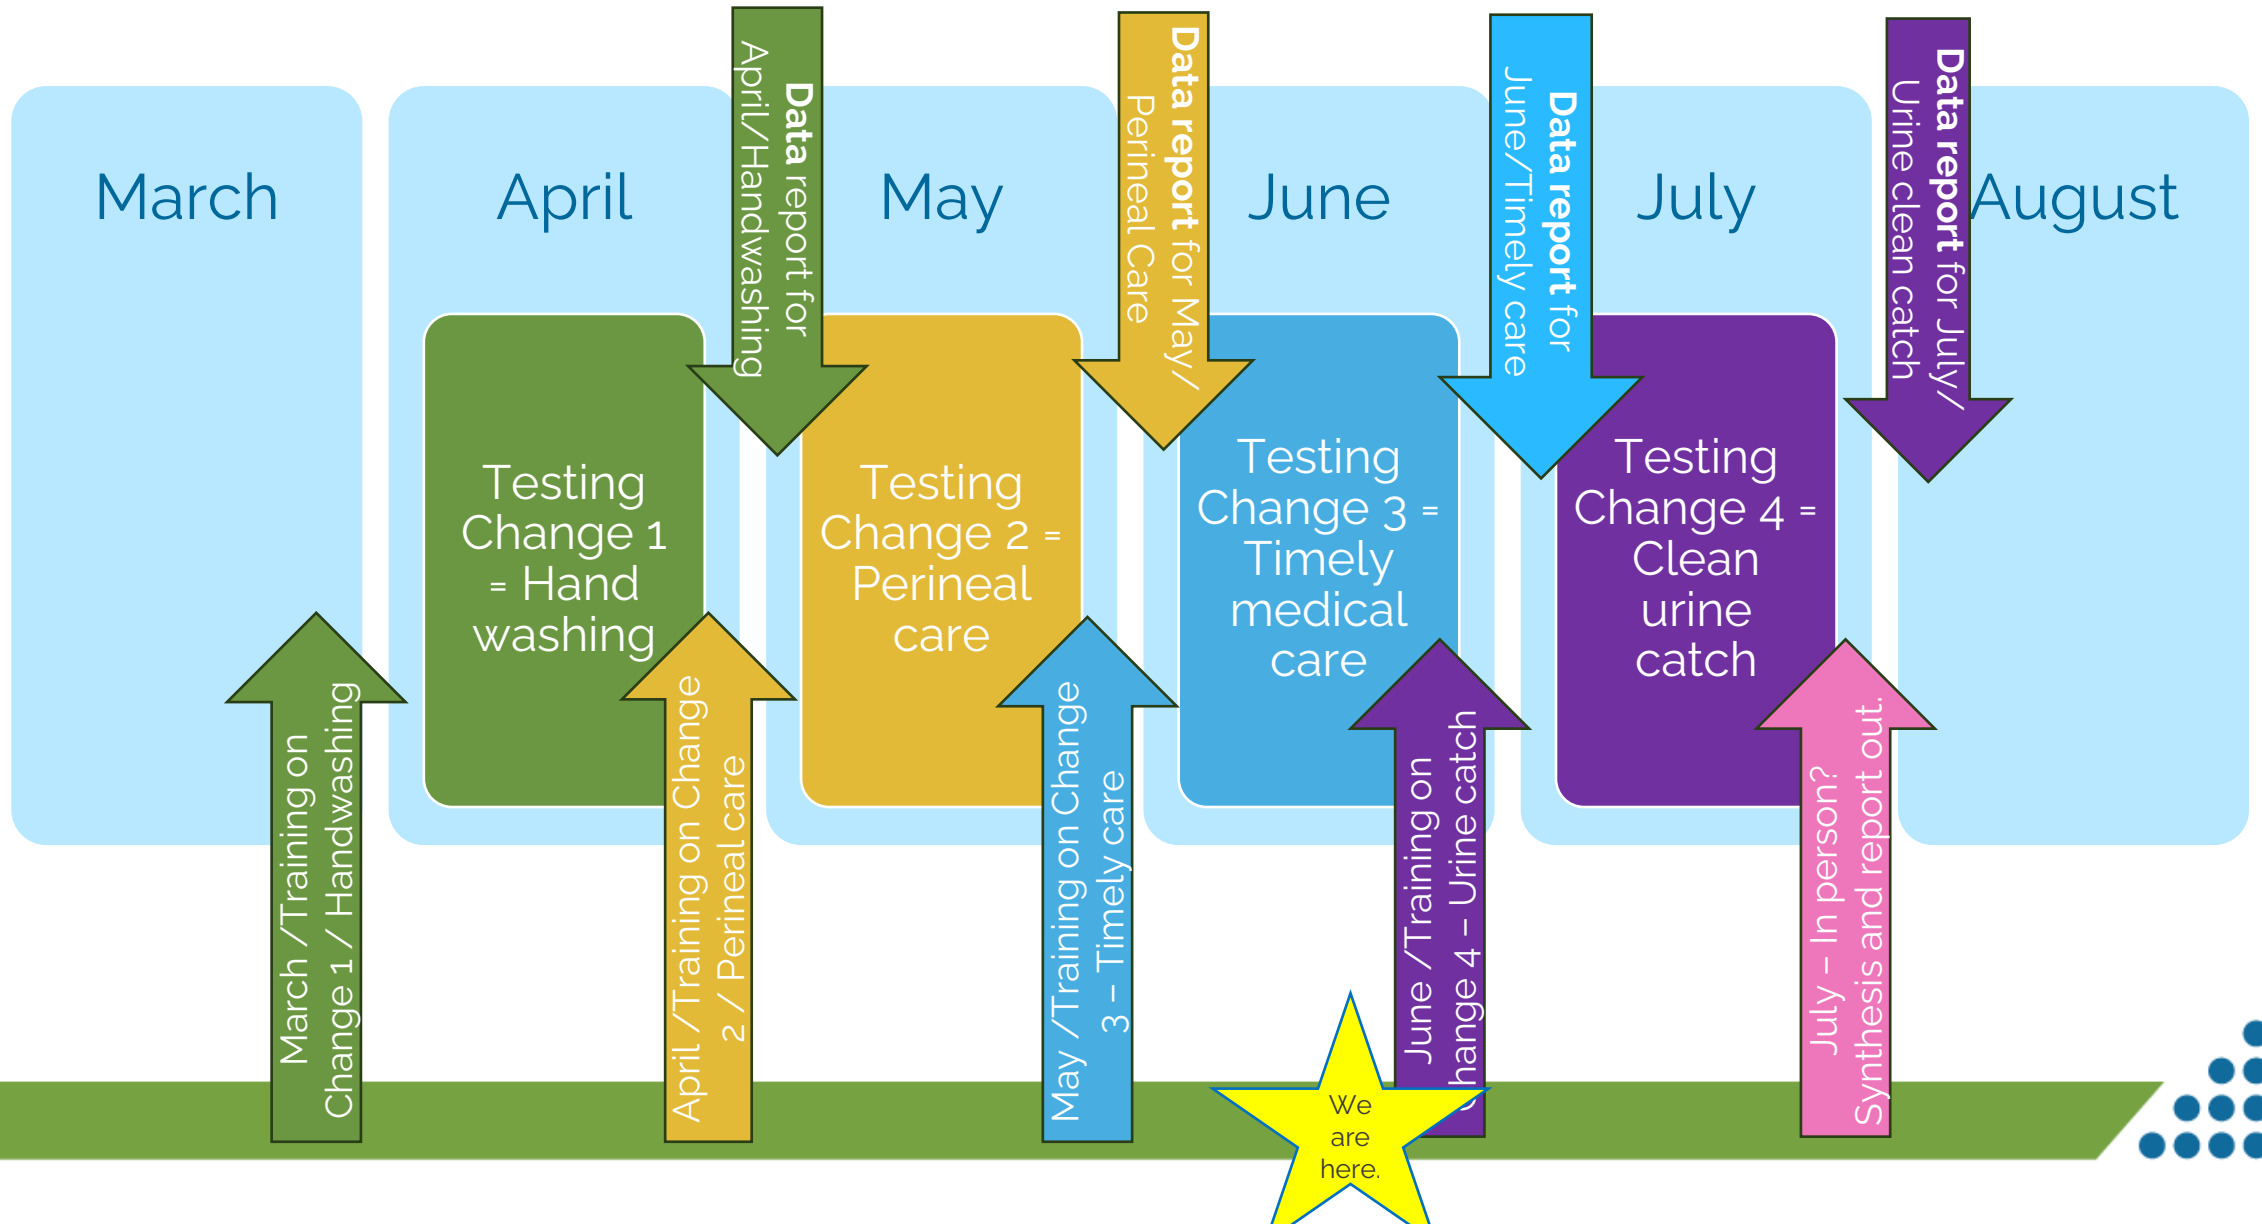

# Review of data collection and reporting for: May 2024 Data [reported in early June]

Thank you for reporting your **May data!** 100% of sites reported!

UTI Learning Collaborative Data  
Number of individuals served, N with UTIs and % with UTIs each Month

■ Number of individuals	67	64			
■ Number of individuals with UTIs	1	1			
■ Percent of individuals with UTIs	1.5%	1.6%	0.0%	0.0%	0.00

# Clean Urine Catch - OIH

# Quality Corner

- Mary Beth Cox
- Pebbles Brown

## The Three Questions

**1**

### Aim

What are we trying to accomplish?

**2**

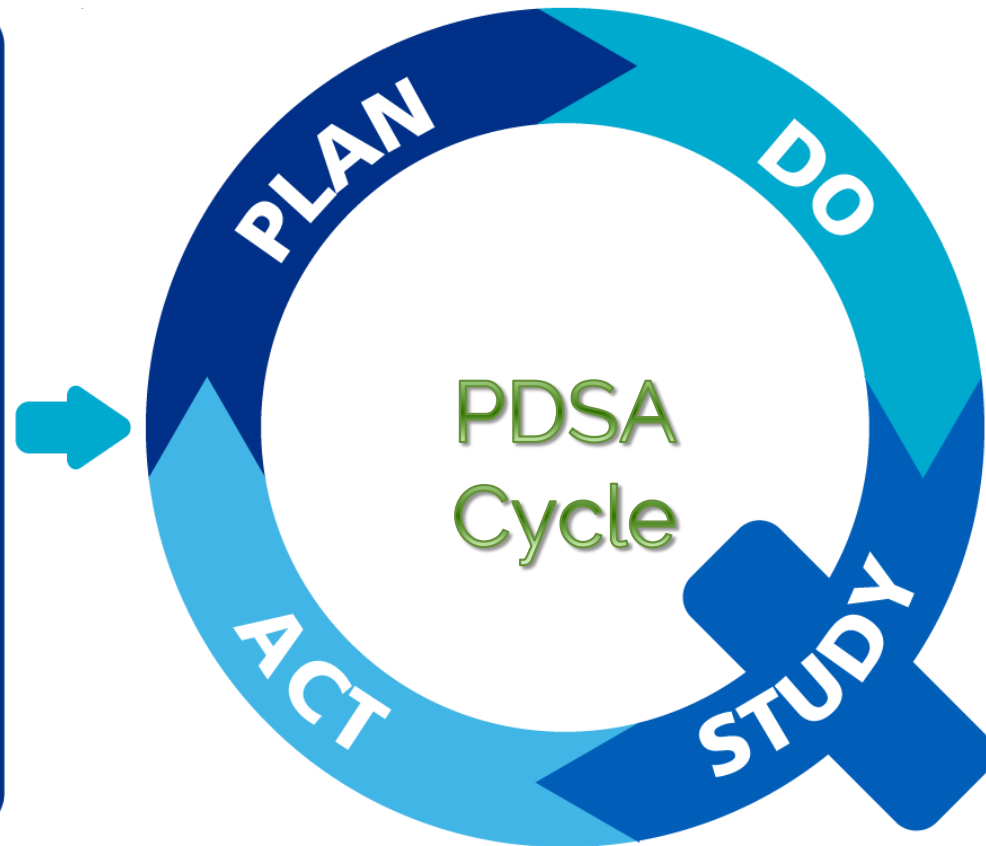

### Measure

How will we know that a change is an improvement?

**3**

### Change

What changes can we make that will result in an improvement?

## NEXT Try using the Model for Improvement<sup>2</sup> and the Plan-do-Study-Act (PDSA) Cycle.

**Aim:** What are you trying to accomplish? What is your SMART Objective? (Specific, Measurable, Achievable, Relevant, Time-bound)

**Measure:** How will you know a change is an improvement? Describe the measurable outcome(s) you want to see.

**Change:** What change can you make that will result in an improvement?

### Act and decide what to do next. You can:

**Adapt:** Modify the changes and do another PDSA cycle.

**Adopt:** Continue or expand the change in your organization.

**Abandon:** Abandon this change and select a different change to test in the next cycle.

Document and describe what changes to make for the next cycle based on what you learned.

### Study the change you made.

Study and analyze the data you collected. Document how the measured results compare to the predictions. What did you learn? Did the change result in the expected outcome? Were there any surprises, successes, failures, unintended consequences? What would you do different in another test?

### Plan a test of your change.

Document the steps that you are going to do. What is your timeline? Who will be involved? When and how will the change happen? What resources will you need? What do you think will happen when you make the change? What data do you need to collect? How will you collect it? When will you have the data?

### Do (implement) the plan.

Carry out the plan on a small scale to begin with. Document your steps and observations, including any problems and unexpected findings or events. Collect the data you need, per your plan. Describe what happened when you ran the test.

**CONTINUE** Plan-Do-Study-Act Cycles based on what you learn in order to achieve improvement.

### Job Aid: Plan-Do-Study-Act (PDSA) Worksheet

# Filling out the PDSA

<p><b>Aim Statement:</b> What is your baseline data, and what is your SMART objective?</p>	<p>The aim of the UTI learning collaborative is to reduce the percent of individuals experiencing UTIs by September 2024.  <b>The Learning Collaborative, the baseline is: 16/75 (21%)</b> The Goal is: <b>13%</b>  <b>For our organization, the baseline is: _____</b> The Goal is: <b>_____</b></p>																																			
<p><b>Measure:</b> Describe the measure you will use to know that a change is an improvement.</p>	<p>We will measure the number and percent of individuals experiencing any UTIs during the collaborative period (1/1/2024-9/30/2024). We will annualize the results to compare to 2023.  <b>Data collection: We will report the number and percent of any UTIs, and Level I, Level II and recurrent UTIs per individuals served each month during the Collaborative using a MS Form survey tool.</b></p>																																			
<p><b>Change:</b> What change can you make that will result in an improvement? What do you predict will happen when you make the change?</p>	<p><b>Change: The change package includes four prevention strategies (hand washing/hand hygiene, proper perineal care, timely medical care, and urine sample). We will learn the information and then train staff on these new strategies each month, for four months. This month (JUNE) is: Clean Urine Catch</b></p> <ul style="list-style-type: none"> <li><b>We will train _____ (How many) staff on performing a clean urine catch using the Clean Urine Catch Handbook.</b></li> </ul> <p><b>Prediction: When we train staff they will feel more knowledgeable about how to perform a clean urine catch and be able to assist in this process for an individual.</b></p>																																			
<p><b>Plan:</b> Plan a test of your change. Document the steps that are needed. What is your timeline? Who will be involved? Include how you will plan to collect and analyze data to study your change.</p>	<table border="1"> <thead> <tr> <th>Task</th> <th>Who is responsible?</th> <th>Begin and end dates</th> <th>Result</th> </tr> </thead> <tbody> <tr><td> </td><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td><td> </td></tr> </tbody> </table>	Task	Who is responsible?	Begin and end dates	Result																															
Task	Who is responsible?	Begin and end dates	Result																																	
<p><b>Do:</b> Implement your plan. Describe what happened.</p>																																				
<p><b>Study:</b> Study and analyze the data you collected. What did you learn?</p>																																				
<p><b>Act:</b> Decide what to do next. Will you adapt, adopt or abandon?</p>

## PDSA planning and sharing time

- Share ideas: What's going to be in your 'Plan'?
- Make sure to put it on your PDSA Worksheet.
  - How are you going to test this change?
  - How are you going to study this change?
  - Is there another 'change' you're interested in testing?

Preparation for Learning Collaborative wrap-up meeting  
in Person  
July 25, RBHA  
9:00 AM-1:30 PM – Room reserved

---

## Agenda:

- Learning Collaborative in Review – 30 minutes
  - Goals and objectives
  - Change package
  - Data results – Did we meet our Aim?
- Provider Storyboard Presentations + Q&A - 90 minutes
- Breakout + Discussion:
  - Lessons Learned and Recommendations – 30 minutes
- Adjourn

# Prepare a Storyboard of your UTI Learning Collaborative project

## We will email you a template to fill out.

Complete the:

- Background + Aim statement,
  - What did we do?
  - What were the results?
  - What lessons were learned?
  - Data results
  - Team members
- Include data to demonstrate number of individuals with UTIs over time and/or other data you tracked. No PHI.
  - **Complete your Storyboard by Friday, July 19 and send to Pebbles and Mary Beth.**

Agency logo
ACME RESIDENTIAL INC. | JULY 2024

### EXAMPLE: Reducing UTI Risk for Individuals We Serve

**Background:**

Urinary tract infections (UTIs) can have serious implications. Our agency serves individuals at risk for UTIs and we have had some negative outcomes over the years including sepsis and repeat hospitalizations.

**Aim:** The percent of individuals who had a UTI in 2023 was 21%. Our aim was to reduce this to 10% or less.

We wanted to participate in this Learning Collaborative to learn new strategies to reduce the risk for UTIs for individuals we serve.

*(Dominant image showing the theme of this information.)*

**What did we do?**

We participated in all learning sessions on the four topics: handwashing, perineal care, timely medical care and clean urine catch.

- Handwashing: We trained 25 staff in handwashing and updated our restroom to have better soap and lotion, and plan to do handwashing training for all new staff and annually.

**What did we do? (continued)**

- Perineal care: We trained 25 staff using perineal care video at a staff meeting and did the pre/post test. We ordered new supplies to be better prepared to provide hygienic care.
- Timely care: We worked with 10 individuals to develop the My Care Passport, starting with those at risk for UTIs, and filled out the Medical Care Card. We plan to do the MCP with all individuals in the next 2 months.
- Clean Urine Catch: \_\_\_\_\_

**What were the results?**

- We did the pre/post tests for each intervention when we trained staff. There was an increase in knowledge and skills each time.
- Staff also reported being very happy to receive the information. We plan to integrate these tools/resources into our annual training.
- In 2023, from January-June, there were **17/86** individuals who had a UTI. **This was 20% of individuals.**
- In 2024, there have been **9/86** individuals with a UTI during this same time period. **This was 11% of individuals.**

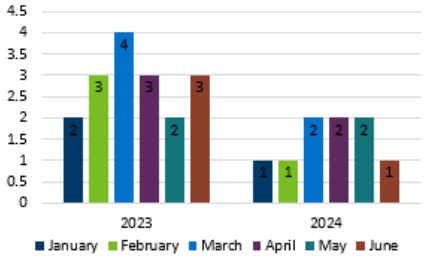

**What lessons were learned?**

We realized that we had assumed that seasoned employees knew the risks and strategies to prevent UTIs. However, it was beneficial to review the information and staff learned new things – especially \_\_\_\_\_.

Also, we realized that due to staff turnover, many staff had not been exposed to this information, so it was a good reminder to provide training on UTIs for all new staff. The information and tools provided by OIH was easy to use and well organized, so we will definitely keep using it.

*(Chart/graph image of associated data.)*

Number of Individuals with Any UTI – 2023 v. 2024, January-June

Year	January	February	March	April	May	June
2023	2	3	4	3	2	3
2024	1	1	2	2	2	1

Institute for Healthcare Improvement developed the following recommendations for creating storyboards:

- ✓ A clearly defined Aim Statement with an expected change and timeline.
- ✓ An outline of your strategy for change that explains how you will reach your aim.
- ✓ An explanation of the changes made to achieve improvement in the targeted process.
- ✓ Graphical representation of improvement.
- ✓ An indication that changes were tested and/or adapted prior to implementation.
- ✓ An explanation of how multiple measures were used to understand and show improvement.
- ✓ A listing of the multi-disciplinary team that was involved in achieving improvement.
- ✓ A demonstrated sustainability in improvement indicated by the data (if possible).
- ✓ A short summary of the lessons learned from the work and/or the message for readers.
