Date: October 16, 2024

From: Jae Benz, Office of Licensing

Subject: Due Date to Transition to the new CRC License extended to 11-15-24 for providers who met 8-30-24 submission deadline

Dear Providers,

The original due date for all providers who have been delivering 23-hour crisis receiving center services to transition to the new CRC license has been extended from October 17, 2024 to November 15, 2024. Please note, this applies only to providers who submitted a completed application by the August 30, 2024 due date. Providers who have submitted their information after August 30, or submitted incomplete or inaccurate information, may not be licensed by November 15th. This may result in an inability to provide this service until properly licensed. Licensing staff have been responding to revisions within a maximum of one to two days. Providers who have received an onsite inspection, and who do not meet staffing or physical site requirements, will require an additional onsite inspection. Where possible, licensing will attempt to conduct those prior to November 15th; however, providers ready for their initial onsite inspection will be prioritized.

Thank you,
Office of Licensing
